£2.00 on the door to include teas and biscuits

PORTLAND SPY RING 1961

Quote from speaker

This is a true incident in which I was involved as a technician helping to set up secret radio equipment in order to identify their transmissions to Russia.

This is a fascinating story full of bribery and corruption, deceit, treachery, back-stabbing, infidelity and a good old-fashioned love story.

Because of their event capture and prosecution at the Old Bailey, most of it was held 'In Camera' and because so little of their activities was made available to the general public, the story has more questions and answers.

My interpretation of what I think had been going on is based upon my own personal input plus other research. The full truth is of course locked away in the secret archives of the Old Bailey.
